

. The OCIE specified below is the minimum requirement for all active duty DOD service members and civilians deploying in support of Operation Iraqi Freedom (OIF) or Operation Enduring Freedom (OEF). All deploying personnel will have these items in their possession prior to CONUS departure, unless otherwise indicated. Commanders will ensure personnel have the correct sizes and that all OCIE is fully serviceable for the duration of the deployment, barring unusual circumstances. Soldiers and Civilians will deploy with the primary, first listed, OCIE item, or the alternate, second listed, OCIE item.

NOTE 1: For Soldiers, DA/DoD Civilians and contractors deploying to OIF and OEF the interceptor body armor (OTV and SAPI) is available at the mob station/CRC. If none is available the individual will deploy and it will be drawn in theater, however, stocks in theater are low and all possible attempts to have IBA prior to deployment must be attempted. All Soldiers who will deploy into Iraq will receive IBA as part of RSOI.

NOTE 2: For Soldiers and DA/DoD civilians this is total minimum quantity of duffel bags (4 each) that individual will have when they leave their mobilization station. For Soldiers, this is three more in addition to the one in their clothing bag issue.

NOTE 3: Desert tan boots are prescribed, however, if prescribed boot indicated is not available in the correct size then Soldiers deploying to theater can use the older desert boot, LIN B16584 until the HW/Tan desert boots can be issued in theater. Rapid Fielding Initiative (RFI) will issue two pairs of desert tan boots in theater; the Mob Station will not make a duplicate issue. The maximum authorized quantity of desert tan boots regardless of source of issue is two pairs. The Intermediate Cold Weather Boot may also be issued.

NOTE 4: Soldiers will report with the MOLLE system applicable for their MOS with as many pockets or other attachments as the unit commander wishes, or pack the unit has available. If MOLLE is not available then either the load bearing vest or the suspenders and belt combination will be issued with the corresponding field pack and frame. DA/DoD Civilians will be issued either load bearing vest or the suspenders with belt combination.

NOTE 5: Items are part of the extended cold weather clothing system and part of the rapid fielding initiative (RFI). Commanders may determine items to issue based on deployment location. The mob station will not duplicate RFI issues.

NOTE 6: Authorized for issue to the Army and Air Force Exchange Service (AAFES) civilian personnel. Items will be issued by quantities identified. In addition, chemical defense equipment will be issued to AAFES personnel (see section 6-3c below):

NoLIN	Mask, Chemical Land	1
NoLIN	Canister C2A1	2

NOTE 7: These items are being issued as RFI items. To ensure items are not duplicated PPPs, PSPs or CRCs will not issue any items marked with this note if it can be validated that these items are in the possession of the Soldier.

NOTE 8: The ACU will be issued, however, if there are not stocks of the ACU the Soldier or DA Civilians can be issued C43484, Coat Camouflage Desert and T35238, Trousers Camouflage Desert,

C04411 CAP CAMOUFLAGE DESERT AND H20256 HAT CAMOUFLAGE DESERT in lieu of ACU items. The total quantity of ACUs and DCUs coats and trousers will not exceed four sets; cap and hat totals will not exceed one each regardless of pattern

NOTE 9: SAPI/ESPI will be issued to all deploying soldiers. If SAPI/eSAPI is not available at MOB station, it will be issued in theater. Not receiving SAPI/eSAPI prior to deployment will not cause a Soldier to be non-deployable

NOTE 10: Contractors at a minimum will be issued protective equipment to include all prescribed NBC gear, helmet (either PASQT or ACH), and OTV and SAPI plates. If eSAPI is issued in theater, the contractor will maintain the SAPI plates and bring them back to CRC for turn-in along with all other equipment issued out of CRC.

NOTE 11: See paragraphs 6-2 g, h, and i.

c. The above OCIE list is exclusive of individual protective equipment (IPE), formerly known as chemical defense equipment (CDE) that is authorized via other means and directives. Units are to requisition via the Soldier Biological Chemical Command Army electronic product site at: <http://aeprs.ria.army.mil/>. When AMC and FORSCOM verify the requirement, IPE is free issue to the unit. If mobilization time is short, the unit may request a change on the ship to address in the ordering process and have the items sent directly to the mobilization station. Military personnel will be issued the following items (DA civilians and contractors will be issued a protective mask at the CRC; theater will issue remaining IPE items as mission dictates):

- | | |
|--|-----------------|
| • MASK PROT M-40 | 1 PER INDIV |
| • COAT CHEMICAL PRO JS/LIST | 1 PER INDIV |
| • TROUSERS CHEMICAL JS/LIST | 1 PER INDIV |
| • M256 CHEMICAL DETECTOR KIT | 1 PER INDIV |
| • M9 CHEMICAL DETECTOR PAPER | 1 PER INDIV |
